

## 1 ABSTRACT

2 A retail purchaser of a previously-purchased remote-controlled retail electronic  
3 entertainment device may retrofit said remote-controlled device to provide an increased  
4 acceptance angle for an infrared receiver thereof by performing the steps of: a) purchasing, on a  
5 retail basis, a hemispheric lens; and b) securing the hemispheric lens to the face of the  
6 previously-purchased remote-controlled device over the infrared receiver thereof. Retrofitting of  
7 a previously-purchased remote-controlled retail electronic entertainment device by a retail  
8 purchaser of said previously-purchased device to provide an increased acceptance angle for an  
9 infrared receiver thereof may be enabled by performing the steps of: a) selling, on a retail basis  
10 to the retail purchaser of the previously-purchased device, a hemispheric lens; and b)  
11 instructing the retail purchaser to secure the hemispheric lens to the face of said remote-  
12 controlled device over the infrared receiver thereof.
